

ENLITEON EDGE

Overview

Platform independent

ARM

Vendor neutral

RaspberryPi

JETSON TX2

ENLITEON

Camera technology agnostic

Stereo Vision

Structured Light

Time of Flight ToF

Supported consumer 3D cameras

Supported industrial 3D cameras

BLUETECHNIX

BASLER
the power of sight

odos
imaging

FOTONIC

ENLITEON

Virtual tripwire

Accurate simultaneous counting of multiple persons crossing virtual tripwires.

Counter accumulation

Get countings in real-time
or get accumulated data
every 15 minutes,
every hour or
every 12 hours

People counting - Via Montenapoleone - 27 Jul 2017

Full resolution real-time tracking

Each point
represents the
centroid of the
head and
heatmap colors
the most
frequented
areas

Grid heatmap

Track points can be
accumulated in a
square grid heatmap

	6	5	18	14	19	14	14	28	25	9	6	4	2		
24	458	26	36	29	24	13	15	31	42	5	18	15	15	227	58

Dwell time in regions of interest

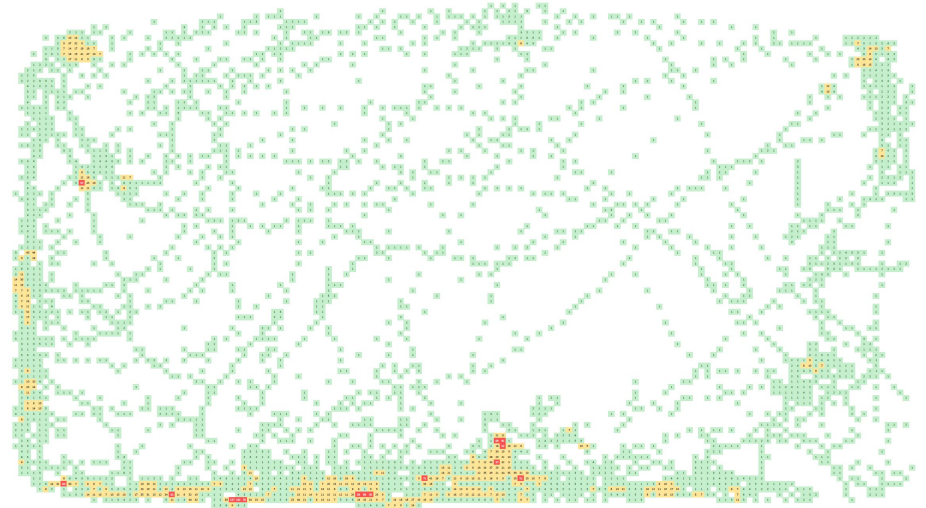

Multiple Regions
of Interest can be
set to constantly
monitor dwell
time

Track points in real-time

Date	27-Jul-17
Time	18:00:00
X	45
Y	91
Track ID	2351

Coordinates are in pixels in the camera's reference frame

Track vectorial kinematics

Δt	0.04 sec
Δx	5 pixel
Δy	-2 pixel
Vector length	5.39 pixel
Vector orientation	-38°
Speed	161

Track analytics

Track ID	38871
Number of points	248
Total track time	17.2 sec
Total track length	238 pixel
Average speed	14 pixel/sec

MQTT for real-time asynchronous communication

RESTful for synchronous querying (tba)
